Nothing leaves without your passkey.

Your Mezo trove and MUSD. Software can ask.
Only the bound passkey spends.

witness-agent.vercel.app

Six actions. One passkey each.

Transfer

MUSD to the address in the signature.

Open trove

BTC from the vault into a Mezo trove. MUSD borrowed into it.

Pool deposit

MUSD into the Mezo Stability Pool.

Add collateral

More BTC into the trove. Raises the ratio. No fee.

Pool withdraw

The position comes back to the vault.

Repay

MUSD from the vault burned against the debt. No fee.

A 0.10% fee is taken from transfers, pool deposits and withdrawals, and borrowed MUSD. Capped at 1% on chain.

HOW A SPEND IS REFUSED

Four checks, then the action.

01 One key

A second passkey does not match, and it is refused.

02 One caller

Only the allowlisted relayer may submit.

03 Exact action

Chain, vault, amounts, and destination are in the signature.

04 One use

The same signature cannot be replayed.

Every path runs the same four checks: transfers, the Stability Pool, and the trove.

A trove the passkey guards.

Open trove

0.043 BTC collateral, 1,800 MUSD borrowed into the vault through BorrowerOperations

`0xf941fe81b3559cd1722f529c235c9a7d31dbc0b8d25b349101bc2ab6ac3ff733`

Add collateral

+0.005 BTC. Collateral ratio 176%. Liquidation is below 110%

`0xa54c300e9aa7146a3448b3342fdf8fd2e1fe538978869a350791d3e09997102b`

Repay

1 MUSD burned from the vault. Debt 2,001.8 to 2,000.8 MUSD

`0x23e3237203c332954ece4098a7ff1c46cd61355805390873cd5fa341c1d4c21e`

The agent asked for twice the approved repay, unsigned. Refused: OverLimit. Nothing moved.

`Trove vault 0xd180dd35522d1297b3cbaa5046b34850ae55569d. Admin locked.`

SHOWN ON MEZO, 6 NOV 2026

The pool round trip landed.

Deposit

1 MUSD into the Stability Pool

`0x66f8a5aec0e25ca2865d317fad4a59f04bae79d6c1fd6fbe0ac64d58a24070a2`

Transfer

1 MUSD. Intent 6 consumed

`0xdefbe4c371f86f039a466c6f527d0c1129fe5736867fe46e00909a8e13e1c77c`

Withdraw

The pool returned the deposit. Intent 8 consumed

`0xd6b0ab45091b7836de162816e9565a6c066db6f41bbd9bda097bca515be9e53f`

An amount above the ceiling was refused. Nothing moved. The vault now holds 98.998 MUSD.

The first safe did not check the key. This one does.

- One passkey, enrolled on witness-agent.vercel.app. A different key is refused.
- Only the allowlisted executor can submit a signed action.
- Opens, tops up, and repays a Mezo trove through BorrowerOperations.
- Deposit and withdraw against the Mezo Stability Pool.
- A 0.10% fee is taken from the signed amount. Admin is locked.
- 66 Foundry tests with real P-256 signatures, green in CI.
- Source matches the explorer. That is a source match, not an audit.

OPEN IT

The recorded vaults stay as they are.

Site	https://witness-agent.vercel.app
Vault and trove	https://witness-agent.vercel.app/app
Contracts	https://witness-agent.vercel.app/security
Code	https://github.com/thesithunyein/witness

A different passkey can open its own vault from the page.
That vault does not touch the recorded ones.
